**Production Exercise #2**

Linguistics 341

Due: Monday, 28th February, 2022

This production exercise is designed to test your ability to produce different places of articulation and different airstream mechanisms. To complete the exercise, listen to the example files that have been posted to the course website for each production item. Then attempt to imitate those example files to the best of your ability. Record yourself producing each item in Praat, save your recordings to a sound file(s), and upload them to the PEX2 (Production Exercise #2) dropbox on the D2L site for the course. Please let me know if you have any questions or any technical difficulties in completing this exercise.
